## MEDIA RELEASE

### New Major Sponsor Joins Centaur Racing

Centaur Racing is pleased to announce a new Major Sponsor with GB Galvanizing Service P/L joining the team from next week's Ipswich 300.

In a major deal for the new team, GB Galvanizing will be seen on the bonnet and on the rear of the #3 Centaur Commodore through until at least the end of 2011.

"It's great to be welcoming GB Galvanizing to the team, they have a very strong name in the industry and a successful business based around quality products and building solid relationships," said team owner Al D'Alberto.

"You can really feel the momentum coming from good results on track. We have a very focused team and dedicated sponsors who want to be a part of our growth. It's an exciting time for all of us," added D'Alberto.

Established in 1980 and based in Melbourne's eastern suburbs of Bayswater and Dandenong, GB Galvanizing is Victoria's largest galvanizing firm, an industry leader providing state of the art production methods and servicing both local and interstate customers with a fleet of 11 semi trailers, including crane trucks and B doubles.

Managing Director Gian Gucciardo welcomed Tony and his team to the GB Galvanizing family and believes that the sponsorship couldn't come at a better time for both parties.

"Our brand is growing, as is Tony's and we see real strength in being a part of Centaur Racing's rise in V8 Supercars," said Gucciardo.

"This partnership comes at a good time for both of us. Al, Tony and the team are doing a great job, we recognise that and want to be a part of it," added Gucciardo.

With a number of new sponsors in recent weeks and a desire for more success on the track, D'Alberto acknowledges that Centaur Racing is hungry for more.

"Momentum is a big thing in sport, so we've got to keep moving forward. There will be some tough days along the way, that's the nature of sport, but we are totally committed and focused on earning results and making sure our sponsors feel like they're an important part of the team," said D'Alberto.

"Personally, I'd like to thank Gian and the team from GB Galvanizing for seeing our potential and supporting us. We still have some sponsorship opportunities open, so hopefully we have more good news on the horizon."
